Like Texon, SAKHO Enterprises is another sponsor that's now joined ASW Marketplace to offer its products and services for the benefit of the industry.

Bengaluru-based SAKHO has made a name for itself, ever since its inception in 2011, in providing affordable automation solutions to the apparel sector.

So, if you are at ASW Marketplace, you can witness SAKHO's innovation and uniqueness that it brings with regard to machines and applications.

For an industry that's always looking for a partner that will help meet fast growing market needs, SAKHO is the one to look out for.

Closely associated with globally renowned industry stalwarts like Martin Group and equipped with some of the best technologies in the world, which include the likes of H&H, NISSIN, BKS, ENS, Leonard & Thermotron to name a few, SAKHO has become a force to reckon with in the apparel manufacturing industry in the South Asian region.

Back in 2016, SAKHO had launched UNIK TECHNOLOGY in Bengaluru – a design studio that helped designing and making samples using bond and seam sealing technology.

The studio won all acclaim for the technology that had the expertise of H&H and support of business partner RCG.

SAKHO is focussed on helping the apparel industry embrace this concept with practical bonding technology at every step be it in sampling, job work, application engineering, trims such as tapes, adhesive and logos, bulk production, machine supply and factory set-up.
